

## Recommendation Letter for Jeremy Bertin

With great pleasure we received the application of Mr. Jeremy Bertin for our 3-month full-time CodeMaster Bootcamp at the Talent Garden Innovation School and we accepted him to join the next class for different reasons.

First of all, Mr. Bertin showed huge motivation during the personal application interview and he convinced me of his determination and his desire to become a programmer. Motivation and determination are the two most important criteria we evaluate in our selection process and Mr. Bertin showed the highest level.

His passion for coding and new technologies can make a difference for his future internship and his first steps to the job market as a developer.

I also observed an overflowing energy and a great positivity, that can be an essential motor for a classroom or a team and can positively affect his future colleagues.

I'm sure that Mr. Bertin will be a person who will help beginners due to his acquired experience in the domain and also his general professional experience. Mr. Bertin showed me that he is eager to learn but also to share.

Last but not least, I think with his personality he can get along well with anybody due to his open mind and his easiness to connect with others.

I'm convinced that he will work very hard to reach his goal of becoming a great developer and he is somebody you can rely on.

For all those reasons we want to encourage you to help Mr. Bertin to succeed on what he undertakes for his professional career.

Vienna, September 9th, 2019
